Profile

Computer Science student passionate about backend development, with solid experience in **Node.js**, **TypeScript**, and **SQL** databases. Skilled in building scalable APIs and modern fullstack solutions using React, PostgreSQL, and cloud deployment platforms.

Experience

Love Distance (Full-Stack Project): Developed a full-stack application from scratch using React, Node.js, and PostgreSQL to ease the challenges of long-distance relationships through shared digital tools.

Finance API : Designed RESTful API using Node.js, Express, and PostgreSQL. Developed services for complex data management, including a project for financial operations.

Weather REST API : Engineered a Node.js API to serve weather data by consuming a third-party service. Implemented a Redis caching layer to significantly reduce latency and optimize API call rates.

Education

Bachelor's in Computer Science – Universidade Anhembi Morumbi (Ongoing)

Technical Skills

Languages: TypeScript, JavaScript, PHP

Development: Backend: Node.js, Nest.js, Express.js, REST APIs, Fastify, WebSockets (Socket.IO)

Frontend: Next.js, React, Tailwind CSS, Axios

Databases: PostgreSQL (Relational), MongoDB (NoSQL)

Architecture & System Design: Software Engineering Fundamentals, Scalability, Data Structures & Algorithms
Tools: Git, GitHub

Achievements

Oracle & Alura Scholarship Program – Selected for a competitive software development program focused on hands-on industry projects.

Languages

English (Advanced), Portuguese (Native), French (Basic)
