EXPERIENCES

- I have hands-on experience developing REST APIs and other projects (available on my GitHub) using Node.js, TypeScript, Nest, and PostgreSQL, focusing on software architecture and best practices. Additionally, I collaborated on real-world projects with Oracle and Alura through a scholarship program, strengthening my skills in modern technologies and team development.

TECHNICAL SKILLS

Technical Skills

- Languages: TypeScript, JavaScript, SQL, Python
- Full-Stack Development:
 - Backend: Node.js, Nest.js, Express.js, REST APIs, WebSockets (Socket.IO)
 - Frontend: Next.js, React, Tailwind CSS, Axios
- Databases: PostgreSQL (Relational), MongoDB (NoSQL)
- Architecture & System Design:
 - Software Engineering Fundamentals, Scalability, Data Structures & Algorithms
 - Cloud-Native Architectures (deployment on Vercel/Render)
- DevOps & Tooling:
 - Git, GitHub, Version Control
 - CI/CD Pipelines (via Vercel & Render integrations)
 - Modern Development Tooling (Docker, npnm/yarn)

PROFESSIONAL SUMMARY

Seeking to apply best practices in coding, versioning, testing, and deployment to contribute effectively to software projects. My goal is to learn within multidisciplinary teams, enhance my product-focused thinking, and explore how Artificial Intelligence can be used to boost productivity and creativity in development, guided by authenticity and a critical mindset.
